#112

2-FACET SINGLE EDGE BLADES #112

Options:

- .009" Regular Duty
- Carbon Steel
- Heavy Duty Steel Back
- Wrapped

When it matters:

2-facet:

A good balance of sharpness and durability. Primarily for scraping and basic cutting.

Backing:

Steel backing is stiffer and tends to be used to cut material versus to scrape or clean. Aluminum back allows the user to flex or bend the blade.

Carbon Steel:

Harder than stainless; both durable and sharp.

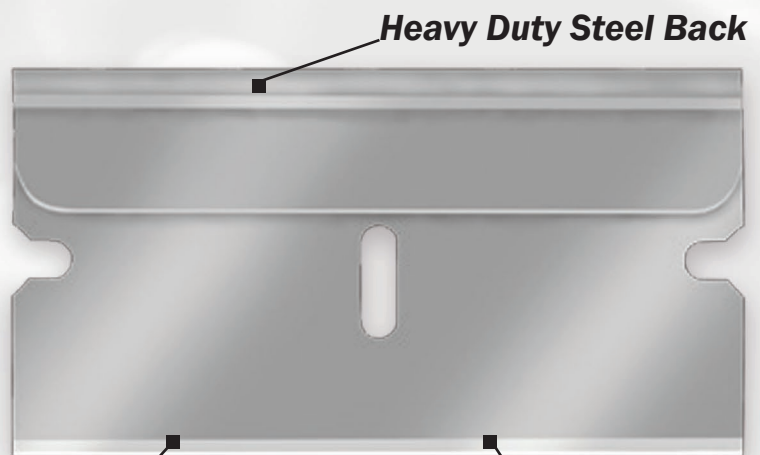

Uncoated Blade:

No additional coating. In many cases coatings are not needed for the application, and the blade tends to be less expensive than coated blades.

Packaging Options

- 100 Pack Clamshell

Ideal for "Auto Jobber" market!

Precision ground edge

Carbon Steel
